Completion Ceremony of Mukaihama Wind Power Plant

Nippon Paper Venti Wind Power Co. Ltd. (President: Hiroyuki Sato, Yoshiomi Todo), a joint venture company between Venti Japan Inc. (President: Hiroyuki Sato) and Nippon Paper Industries Co., Ltd. (President: Fumio Manoshiro) had been constructing a new wind power plant in Mukaihama beach area of Akita city with the facility of 3 wind turbines plant and recently completed the installation. Today we held the completion ceremony at the site.

This power station is already in operation since January this year with the output capacity of 7,485 kW. The output power will be sold to the power companies under "Feed-in-tariff (FIT)" scheme for renewable energy.

The company plans to take full advantage of the wind power resources in the region of the Akita and to contribute to stable supply of electric power and the local economy, also to contribute to the realization of a low-carbon society.
